

Subject Vision

Subject: Art & Design

Subject lead: Louise Chalmers

Vision:

At our school, Art and Design is a vibrant and inspiring subject that nurtures the gifts and talents of every child through a rich, inclusive curriculum designed to spark creativity and wonder. We aim to cultivate creative thinking skills, curiosity, and a love of learning by encouraging pupils to explore and express themselves through art while celebrating the beauty of God's creation. Art provides opportunities for children to reflect on their own experiences, develop resilience, and imagine a brighter future, fostering hope and confidence in their abilities. Through collaborative projects and shared creativity, pupils learn to value and respect one another, building a sense of community and compassion. By learning both through Art—exploring their own creative potential—and about Art, appreciating the works of others, our pupils grow in their understanding of themselves, their faith, and the world around them.
