

Subject Vision

Subject: Computing

Subject lead: Amy Nesbit

Vision:

At St Mary's, inspired by faith, hope, and love, we nurture children's curiosity and confidence in computing and artificial intelligence. We believe in each child's potential, fostering creativity, critical thinking, and ethical use of technology. We aim to develop digital literacy, enabling pupils to discuss and understand technology thoughtfully, alongside fluency in practical computing skills. By nurturing curiosity and compassion, we prepare our pupils to embrace innovation responsibly and contribute positively to a future shaped by digital advancements.

*"Technology is best when it brings people together and helps us imagine a better future." —
