

Subject Vision

Subject: Design & Technology	Subject lead: Alana Rowlandson
Vision: DT: Design and Technology is an inspiring, rigorous and practical subject here at St. Mary's. We would like our children to use their limitless creativity and imagination to design and make aesthetically-pleasing products within a variety of contexts, considering their own and others' needs and wants. We share the hope that these children will be the next generation to shape our future for the better, creating products for us that solve problems which may not even exist yet.
