

# Subject Vision

<b>Subject: Mathematics</b>	<b>Subject lead: Alana Rowlandson</b>
<b>Vision:</b>  For all our children to have a resilient approach towards mathematics with the faith that anyone can achieve and succeed in this subject through a positive approach and a love of learning new mathematical concepts. We wish for our children to leave St. Mary's equipped to reason and solve problems logically and systematically ready to prepare them for their next step in education and be enthusiastic about what they are yet still to learn.
