

Subject Vision

Subject: Science	Subject lead: Julie Purnell
Vision: <p>At the heart of St Mary's primary science learning, we nurture a spirit of faith and hope, inspiring the children to explore the world with curiosity and an open mind. We foster a community of learners united by a love of discovery, where every child feels valued, respected and included. We empower the children to think and work scientifically and to see themselves as scientists, both in the present and in the future.</p>
